

**What is the primary function of the pancreas in the human body**

- A. Regulate heart rate
- B. Produce bile
- C. Produce digestive enzymes and insulin
- D. Store excess water

**Answer: C. Produce digestive enzymes and insulin**

**What hormone does the pancreas produce to regulate blood sugar levels**

- A. estrogen
- B. glucagon
- C. testosterone
- D. insulin

**Answer: D. insulin**

**What is the name of the enzyme produced by the pancreas that helps digest carbohydrates**

- A. Protease
- B. Insulin
- C. Lipase
- D. Amylase

**Answer: D. Amylase**

**Where is the pancreas located in the body**

- A. Behind the stomach

- B. In the brain
- C. In the chest
- D. In the foot

**Answer: A. Behind the stomach**

**What is the medical term for inflammation of the pancreas**

- A. Hepatitis
- B. Appendicitis
- C. Pancreatitis
- D. Gastritis

**Answer: C. Pancreatitis**

**What is the role of the pancreas in the endocrine system**

- A. Aids in digestion
- B. Regulates body temperature
- C. Produces insulin
- D. Regulates blood pressure

**Answer: C. Produces insulin**

**What is the name of the condition where the pancreas does not produce enough insulin**

- A. Insulinoma
- B. Hypoglycemia
- C. Pancreatitis
- D. Diabetes

**Answer: D. Diabetes**

**What is the name of the surgery to remove a portion of the pancreas**

- A. Pancreas removal
- B. Pancreatitis
- C. Pancreatectomy
- D. Pancreasectomy

**Answer: C. Pancreatectomy**

**What is the name of the hormone produced by the pancreas to stimulate the release**

- A. Glucagon
- B. Cholecystokinin
- C. Insulin
- D. Somatostatin

**Answer: B. Cholecystokinin**

**What is the name of the condition where the pancreas becomes damaged due to exc**

- A. Pancreatitis
- B. Alcoholitis
- C. Alcohol poisoning
- D. Pancreatic cancer

**Answer: A. Pancreatitis**

**What is the name of the test used to measure the levels of pancreatic enzymes in the**

- A. Enzyme level test
- B. Pancreatic level test
- C. Blood enzyme test
- D. Pancreatic enzyme test

**Answer: D. Pancreatic enzyme test**

**What is the role of the pancreas in the digestive system**

- A. Produces enzymes to help break down food
- B. Regulates blood sugar levels
- C. Stores bile
- D. Helps with breathing

**Answer: A. Produces enzymes to help break down food**

**What is the name of the condition where the pancreas becomes inflamed due to gall**

- A. Acute pancreatitis
- B. Pancreatic inflammation
- C. Pancreatic obstruction
- D. Gallstone pancreatitis

**Answer: A. Acute pancreatitis**

**What is the name of the imaging test used to diagnose pancreatic cancer**

- A. X-ray

- B. MRI
- C. CT scan
- D. Ultrasound

**Answer: C. CT scan**

**What is the name of the hormone produced by the pancreas to regulate digestion and blood sugar levels?**

- A. Cortisol
- B. Estrogen
- C. Glucagon
- D. Insulin

**Answer: D. Insulin**

**What is the name of the condition where the pancreas produces too much insulin, leading to low blood sugar levels?**

- A. Pancreatitis
- B. Hypoglycemia
- C. Diabetes
- D. Hyperinsulinism

**Answer: D. Hyperinsulinism**

**What is the name of the condition where the pancreas produces too much digestive enzymes, leading to inflammation and pain?**

- A. Gallstones
- B. Pancreatitis
- C. Diabetes
- D. Cirrhosis

**Answer: B. Pancreatitis**

**What is the name of the hormone produced by the pancreas that stimulates the liver**

- A. Estrogen
- B. Cortisol
- C. Insulin
- D. Glucagon

**Answer: D. Glucagon**

**What is the name of the cells in the pancreas that produce insulin**

- A. Alpha cells
- B. Gamma cells
- C. Beta cells
- D. Delta cells

**Answer: C. Beta cells**

**What is the name of the condition where the pancreas becomes enlarged due to blo**

- A. Pancreatitis
- B. Pancreatic cyst
- C. Pancreatic cancer
- D. Pancreatic insufficiency

**Answer: A. Pancreatitis**
