

## **What is the primary function of the pancreas in the human body**

- A. Regulate heart rate
- B. Produce bile
- C. Produce digestive enzymes and insulin
- D. Store excess water

## **What hormone does the pancreas produce to regulate blood sugar levels**

- A. estrogen
- B. glucagon
- C. testosterone
- D. insulin

## **What is the name of the enzyme produced by the pancreas that helps digest carbohydrates**

- A. Protease
- B. Insulin
- C. Lipase
- D. Amylase

## **Where is the pancreas located in the body**

- A. Behind the stomach
- B. In the brain
- C. In the chest
- D. In the foot

## **What is the medical term for inflammation of the pancreas**

- A. Hepatitis

- B. Appendicitis
- C. Pancreatitis
- D. Gastritis

**What is the role of the pancreas in the endocrine system**

- A. Aids in digestion
- B. Regulates body temperature
- C. Produces insulin
- D. Regulates blood pressure

**What is the name of the condition where the pancreas does not produce enough insulin**

- A. Insulinoma
- B. Hypoglycemia
- C. Pancreatitis
- D. Diabetes

**What is the name of the surgery to remove a portion of the pancreas**

- A. Pancreas removal
- B. Pancreatitis
- C. Pancreatectomy
- D. Pancreasectomy

**What is the name of the hormone produced by the pancreas to stimulate the release of glucose from the liver**

- A. Glucagon
- B. Cholecystokinin
- C. Insulin
- D. Somatostatin

**What is the name of the condition where the pancreas becomes damaged due to excess alcohol consumption?**

- A. Pancreatitis
- B. Alcoholitis
- C. Alcohol poisoning
- D. Pancreatic cancer

**What is the name of the test used to measure the levels of pancreatic enzymes in the blood?**

- A. Enzyme level test
- B. Pancreatic level test
- C. Blood enzyme test
- D. Pancreatic enzyme test

**What is the role of the pancreas in the digestive system?**

- A. Produces enzymes to help break down food
- B. Regulates blood sugar levels
- C. Stores bile
- D. Helps with breathing

**What is the name of the condition where the pancreas becomes inflamed due to gallstones?**

- A. Acute pancreatitis
- B. Pancreatic inflammation
- C. Pancreatic obstruction
- D. Gallstone pancreatitis

**What is the name of the imaging test used to diagnose pancreatic cancer?**

- A. X-ray

- B. MRI
- C. CT scan
- D. Ultrasound

**What is the name of the hormone produced by the pancreas to regulate digestion and blood sugar levels?**

- A. Cortisol
- B. Estrogen
- C. Glucagon
- D. Insulin

**What is the name of the condition where the pancreas produces too much insulin, leading to low blood sugar levels?**

- A. Pancreatitis
- B. Hypoglycemia
- C. Diabetes
- D. Hyperinsulinism

**What is the name of the condition where the pancreas produces too much digestive enzymes, leading to inflammation and pain?**

- A. Gallstones
- B. Pancreatitis
- C. Diabetes
- D. Cirrhosis

**What is the name of the hormone produced by the pancreas that stimulates the liver to produce bile?**

- A. Estrogen
- B. Cortisol
- C. Insulin
- D. Glucagon

**What is the name of the cells in the pancreas that produce insulin**

- A. Alpha cells
- B. Gamma cells
- C. Beta cells
- D. Delta cells

**What is the name of the condition where the pancreas becomes enlarged due to blo**

- A. Pancreatitis
- B. Pancreatic cyst
- C. Pancreatic cancer
- D. Pancreatic insufficiency
