

What is the anatomical plane that divides the body into left and right halves

- A. Sagittal
- B. Frontal
- C. Coronal
- D. Transverse

Answer: A. Sagittal

Which anatomical plane divides the body into upper and lower portions

- A. Midsagittal
- B. Coronal
- C. Sagittal
- D. Transverse

Answer: D. Transverse

What is the plane that divides the body into front and back sections

- A. Transverse plane
- B. Coronal plane
- C. Sagittal plane
- D. Oblique plane

Answer: B. Coronal plane

What is the name of the plane that runs parallel to the ground and divides the body i

- A. Oblique plane

- B. Vertical plane
- C. Transverse plane
- D. Horizontal plane

Answer: C. Transverse plane

What anatomical plane is perpendicular to the midsagittal plane and divides the body

- A. Transverse
- B. Horizontal
- C. Sagittal
- D. Coronal

Answer: D. Coronal

Which plane divides the body into unequal left and right portions

- A. Coronal plane
- B. Sagittal plane
- C. Frontal plane
- D. Transverse plane

Answer: B. Sagittal plane

What is the name of the plane that divides the body into top and bottom halves but is

- A. Vertical
- B. Transverse
- C. Horizontal
- D. Sagittal

Answer: B. Transverse

What is the plane that divides the body into anterior and posterior sections

- A. Coronal plane
- B. Frontal plane
- C. Transverse plane
- D. Sagittal plane

Answer: A. Coronal plane

Which anatomical plane is perpendicular to the transverse plane and divides the body

- A. Coronal plane
- B. Oblique plane
- C. Horizontal plane
- D. Sagittal plane

Answer: D. Sagittal plane

What is the plane that is parallel to the ground and divides the body into upper and lower

- A. Oblique plane
- B. Sagittal plane
- C. Transverse plane
- D. Frontal plane

Answer: C. Transverse plane

What is the plane that divides the body into superior and inferior sections

- A. Frontal plane
- B. Sagittal plane
- C. Transverse plane
- D. Oblique plane

Answer: C. Transverse plane

Which anatomical plane divides the body into right and left portions, but not equally

- A. Frontal plane
- B. Transverse plane
- C. Sagittal plane
- D. Coronal plane

Answer: C. Sagittal plane

What is the name of the plane that runs perpendicular to the ground and divides the

- A. Vertical plane
- B. Sagittal plane
- C. Transverse plane
- D. Horizontal plane

Answer: C. Transverse plane

What is the plane that divides the body into dorsal and ventral sections

- A. Frontal plane

- B. Sagittal plane
- C. Coronal plane
- D. Transverse plane

Answer: D. Transverse plane

Which anatomical plane is perpendicular to the frontal plane and divides the body in

- A. Frontal plane
- B. Coronal plane
- C. Sagittal plane
- D. Transverse plane

Answer: D. Transverse plane

What is the plane that divides the body into cranial and caudal sections

- A. Horizontal plane
- B. Sagittal plane
- C. Transverse plane
- D. Frontal plane

Answer: C. Transverse plane

What is the name of the plane that divides the body into sagittal and transverse sect

- A. sagittal plane
- B. horizontal plane
- C. frontal plane
- D. coronal plane

Answer: D. coronal plane

Which plane divides the body into dorsal and ventral portions

- A. Transverse plane
- B. Horizontal plane
- C. Sagittal plane
- D. Frontal plane

Answer: A. Transverse plane

What is the plane that divides the body into anterior and posterior sections but is no

- A. Transverse plane
- B. Coronal plane
- C. Parasagittal plane
- D. Sagittal plane

Answer: C. Parasagittal plane

What is the name of the plane that is perpendicular to the transverse plane and divid

- A. coronal plane
- B. frontal plane
- C. horizontal plane
- D. midsagittal plane

Answer: D. midsagittal plane
