

**What is the medical term for the condition characterized by the involuntary contractions of muscles?**

- A. Arthritis
- B. Epilepsy
- C. Fibromyalgia
- D. Dystonia

**Answer: D. Dystonia**

**Which muscle disorder is commonly known as Lou Gehrig's disease?**

- A. ALS
- B. MS
- C. CP
- D. MD

**Answer: A. ALS**

**What is the name of the condition characterized by chronic widespread pain and tenderness?**

- A. Muscle spasm
- B. Chronic fatigue syndrome
- C. Fibromyalgia
- D. Arthritis

**Answer: C. Fibromyalgia**

**Which muscle disorder is caused by the progressive weakening and degeneration of muscles?**

- A. Arthritis

- B. Tendonitis
- C. Muscular dystrophy
- D. Fibromyalgia

**Answer: C. Muscular dystrophy**

**True or false: Muscular dystrophy is a genetic disorder that primarily affects the muscles.**

- A. Sometimes
- B. Maybe
- C. True
- D. False

**Answer: C. True**

**What is the medical term for the condition characterized by the involuntary contractions of muscles?**

- A. Arthritis
- B. Fibromyalgia
- C. Dystonia
- D. Tendonitis

**Answer: C. Dystonia**

**Which muscle disorder is caused by a lack of dopamine in the brain, leading to tremors and rigidity?**

- A. Parkinson's disease
- B. ALS
- C. Multiple sclerosis
- D. Muscular dystrophy

**Answer: A. Parkinson's disease**

**What is the name of the condition characterized by a painful inflammation of the tendon?**

- A. Muscle strain
- B. Bone fracture
- C. Joint arthritis
- D. Tendonitis

**Answer: D. Tendonitis**

**Which muscle disorder is characterized by the sudden onset of muscle weakness or paralysis?**

- A. Muscular Dystrophy
- B. Myasthenia Gravis
- C. Guillain-Barre Syndrome
- D. ALS

**Answer: C. Guillain-Barre Syndrome**

**True or false: Fibromyalgia is a type of autoimmune disorder that affects the muscles and joints.**

- A. True
- B. False
- C. No
- D. Yes

**Answer: B. False**

**What is the name of the condition characterized by the chronic inflammation of the muscle tissue?**

- A. Fibromyalgia
- B. Arthritis
- C. Psoriasis
- D. Dermatomyositis

**Answer: D. Dermatomyositis**

**Which muscle disorder is caused by a deficiency of vitamin D, leading to muscle weakness and bone deformities?**

- A. Fibromyalgia
- B. Rickets
- C. Osteoporosis
- D. Arthritis

**Answer: B. Rickets**

**What is the medical term for the condition characterized by the progressive loss of muscle mass and strength?**

- A. Sarcopenia
- B. Arthritis
- C. Obesity
- D. Osteoporosis

**Answer: A. Sarcopenia**

**Which muscle disorder is caused by the abnormal accumulation of toxic proteins in muscle fibers?**

- A. Muscular Dystrophy

- B. Arthritis
- C. Fibromyalgia
- D. Tendonitis

**Answer: A. Muscular Dystrophy**

**True or false: Myasthenia gravis is an autoimmune disorder that affects the muscles**

- A. Sometimes
- B. True
- C. False
- D. No

**Answer: B. True**

**What is the name of the condition characterized by the chronic tightening and shortening of muscles?**

- A. Arthritis
- B. Fibromyalgia
- C. Carpal Tunnel Syndrome
- D. Tendonitis

**Answer: B. Fibromyalgia**

**Which muscle disorder is caused by the compression of nerves in the wrist, leading to pain and numbness?**

- A. Sciatica
- B. Carpal tunnel syndrome
- C. Tendonitis
- D. Muscular dystrophy

**Answer: B. Carpal tunnel syndrome**

**What is the medical term for the condition characterized by the involuntary contractions of the muscles?**

- A. Cramp
- B. Tremor
- C. Dystonia
- D. Spasm

**Answer: C. Dystonia**

**Which muscle disorder is caused by the inflammation of the muscles and blood vessels?**

- A. Muscular dystrophy
- B. Myasthenia gravis
- C. Fibromyalgia
- D. Polymyositis

**Answer: D. Polymyositis**

**True or false: Polymyositis is a type of autoimmune disorder that primarily affects the muscles.**

- A. Skin disorder
- B. False
- C. Muscles only
- D. True

**Answer: D. True**
