

**What is the name of the bone that forms the anterior portion of the pelvic girdle**

- A. Pubis
- B. Femur
- C. Rib
- D. Scapula

**Answer: A. Pubis**

**How many bones make up the pelvic girdle**

- A. 2
- B. 4
- C. 8
- D. 6

**Answer: A. 2**

**What is the scientific name for the hip bone**

- A. Femur
- B. Fibula
- C. Tibia
- D. Os coxae

**Answer: D. Os coxae**

**Which bone articulates with the sacrum to form the sacroiliac joint**

- A. Radius

- B. Tibia
- C. Femur
- D. Ilium

**Answer: D. Ilium**

**What is the largest foramen in the human body, located in the pelvic girdle**

- A. Obturator foramen
- B. Carpal foramen
- C. Sacral foramen
- D. Femoral foramen

**Answer: A. Obturator foramen**

**What is the Latin name for the hip socket**

- A. Acetabulum
- B. Femur
- C. Tibia
- D. Patella

**Answer: A. Acetabulum**

**What is the name of the joint formed by the articulation between the femur and the h**

- A. knee joint
- B. elbow joint
- C. hip joint
- D. shoulder joint

**Answer: C. hip joint**

**What are the three fused bones that make up the hip bone**

- A. Radius, ulna, carpals
- B. Scapula, clavicle, humerus
- C. Femur, tibia, fibula
- D. Ilium, ischium, pubis

**Answer: D. Ilium, ischium, pubis**

**What is the purpose of the pelvic girdle in the human body**

- A. To help with balance
- B. To aid in digestion
- C. To assist with breathing
- D. Support and protect the internal organs

**Answer: D. Support and protect the internal organs**

**What is the name of the bony prominence on the hip bone that can be felt externally**

- A. Ischial tuberosity
- B. Femoral head
- C. Iliac crest
- D. Sacrum

**Answer: C. Iliac crest**

### **What is the main function of the pelvic girdle in weight bearing**

- A. To support the weight of the upper body and transfer it to the lower limbs
- B. To regulate body temperature
- C. To protect the internal organs in the abdominal cavity
- D. To assist in breathing and lung function

**Answer: A. To support the weight of the upper body and transfer it to the lower limbs**

### **What is the term for the opening in the pelvic girdle that allows for passage of blood**

- A. Obturator foramen
- B. Acetabular foramen
- C. Sacral foramen
- D. Ischial foramen

**Answer: A. Obturator foramen**

### **Which bone of the pelvic girdle is responsible for supporting the weight of the body**

- A. Ischium
- B. Ilium
- C. Pubis
- D. Femur

**Answer: A. Ischium**

### **What is the name of the joint between the two hip bones at the front of the body**

- A. Shoulder joint

- B. Sacrum
- C. Hip joint
- D. Pubic symphysis

**Answer: D. Pubic symphysis**

**What is the term for the joint that connects the two pubic bones at the front of the bo**

- A. elbow joint
- B. knee joint
- C. shoulder joint
- D. pubic symphysis

**Answer: D. pubic symphysis**

**What is the Latin name for the tailbone**

- A. Scapula
- B. Femur
- C. Clavicle
- D. Coccyx

**Answer: D. Coccyx**

**What is the name of the joint between the hip bone and the femur that allows for mov**

- A. Knee joint
- B. Elbow joint
- C. Hip joint
- D. Shoulder joint

**Answer: C. Hip joint**

**What is the term for the curved upper edge of the hip bone**

- A. Hip arch
- B. Iliac crest
- C. Pelvic curve
- D. Femoral ridge

**Answer: B. Iliac crest**

**Which bone of the pelvic girdle is responsible for supporting the weight of the body**

- A. Sacrum
- B. Clavicle
- C. Scapula
- D. Femur

**Answer: A. Sacrum**

**What is the name of the joint between the sacrum and the ilium**

- A. Shoulder joint
- B. Sacroiliac joint
- C. Hip joint
- D. Knee joint

**Answer: B. Sacroiliac joint**
