

### **How many carpal bones are there in the human wrist**

- A. There are 10 carpal bones in the human wrist
- B. There are 12 carpal bones in the human wrist
- C. There are 5 carpal bones in the human wrist
- D. There are 8 carpal bones in the human wrist

**Answer: D. There are 8 carpal bones in the human wrist**

### **Which carpal bone is most commonly fractured in the wrist**

- A. Scaphoid
- B. Hamate
- C. Trapezium
- D. Triquetrum

**Answer: A. Scaphoid**

### **What is the largest carpal bone in the wrist**

- A. Capitate
- B. Scaphoid
- C. Trapezium
- D. Lunate

**Answer: A. Capitate**

### **Which carpal bone articulates with the radius and ulna**

- A. Trapezium

- B. Scaphoid
- C. Hamate
- D. Triquetrum

**Answer: B. Scaphoid**

**Which carpal bone is commonly known as the "hook of the hamate"**

- A. Scaphoid
- B. Hamate
- C. Triquetrum
- D. Trapezoid

**Answer: B. Hamate**

**Which carpal bone is located on the thumb side of the wrist**

- A. Trapezium
- B. Hamate
- C. Scaphoid
- D. Lunate

**Answer: A. Trapezium**

**Which carpal bone is shaped like a boat**

- A. Scaphoid
- B. Capitate
- C. Hamate
- D. Trapezium

**Answer: D. Trapezium**

**Which carpal bone is the most commonly dislocated in the wrist**

- A. Scaphoid
- B. Hamate
- C. Lunate
- D. Triquetrum

**Answer: C. Lunate**

**Which carpal bone is located on the pinky side of the wrist**

- A. Scaphoid
- B. Radial
- C. Ulnar
- D. Lunate

**Answer: C. Ulnar**

**Which carpal bone forms the base of the thumb**

- A. Hamate
- B. Lunate
- C. Trapezium
- D. Scaphoid

**Answer: C. Trapezium**

**Which carpal bone is shaped like a pea**

- A. Scaphoid
- B. Trapezium
- C. Lunate
- D. Pisiform

**Answer: D. Pisiform**

**Which carpal bone is known as the "greater multangular"**

- A. trapezium
- B. scaphoid
- C. pisiform
- D. hamate

**Answer: A. trapezium**

**Which carpal bone is located between the trapezium and capitate**

- A. Lunate
- B. Scaphoid
- C. Hamate
- D. Trapezoid

**Answer: D. Trapezoid**

**Which carpal bone has a tubercle for the attachment of ligaments**

- A. Scaphoid

- B. Triquetrum
- C. Lunate
- D. Trapezium

**Answer: D. Trapezium**

**Which carpal bone has a prominent styloid process**

- A. Hamate
- B. Trapezium
- C. Radius
- D. Scaphoid

**Answer: C. Radius**

**Which carpal bone is commonly referred to as the "trapezoid"**

- A. Hamate
- B. Capitate
- C. Trapezoid
- D. Scaphoid

**Answer: C. Trapezoid**

**Which carpal bone is located distal to the scaphoid**

- A. Lunate
- B. Trapezium
- C. Hamate
- D. Capitate

**Answer: A. Lunate**

**Which carpal bone articulates with the metacarpals**

- A. hamate
- B. lunate
- C. scaphoid
- D. trapezium

**Answer: D. trapezium**

**Which carpal bone is commonly fractured in athletes**

- A. Lunate
- B. Trapezium
- C. Hamate
- D. Scaphoid

**Answer: D. Scaphoid**

**Which carpal bone is located at the base of the index finger**

- A. pisiform
- B. trapezium
- C. hamate
- D. lunate

**Answer: B. trapezium**
