

What is the medical term for the elbow bone

- A. Humerus
- B. Tibia
- C. Femur
- D. Radius

How many bones make up the elbow joint

- A. 3 bones
- B. 2 bones
- C. 4 bones
- D. 1 bone

Which bone in the elbow is known as the "funny bone"

- A. humerus
- B. ulnar nerve
- C. fibula
- D. radius

What is the name of the large bone in the upper arm that connects to the elbow

- A. Humerus
- B. Tibia
- C. Femur
- D. Radius

Which ligament in the elbow is commonly injured in sports such as baseball and tennis

- A. Lateral collateral ligament

- B. Radial collateral ligament
- C. Medial collateral ligament
- D. Ulnar collateral ligament

What is the name of the bony bump on the back of the elbow

- A. Olecranon
- B. Patella
- C. Clavicle
- D. Femur

What is the primary function of the elbow joint

- A. To move the fingers
- B. To allow for bending and straightening of the arm
- C. To flex and extend the knee
- D. To rotate the shoulder

What type of joint is the elbow classified as

- A. Hinge joint
- B. Gliding joint
- C. Pivot joint
- D. Ball and socket joint

Which bone in the elbow is responsible for rotating the forearm

- A. Patella
- B. Radius
- C. Ulna
- D. Humerus

What is the medical term for a broken elbow bone

- A. Sprained ulna
- B. Fractured olecranon
- C. Dislocated radius
- D. Cracked humerus

What is the most common type of elbow fracture

- A. Coronoid fractures
- B. Olecranon fractures
- C. Radial head fractures
- D. Distal humerus fractures

Which muscle in the elbow is responsible for extending the forearm

- A. Biceps
- B. Triceps
- C. Deltoid
- D. Hamstring

What is the name of the fluid-filled sac that helps reduce friction in the elbow joint

- A. Tendon
- B. Bursa
- C. Cartilage
- D. Ligament
